

Optimum - T3 Replacement Parts for Chloropac® Hypochlorite Generators

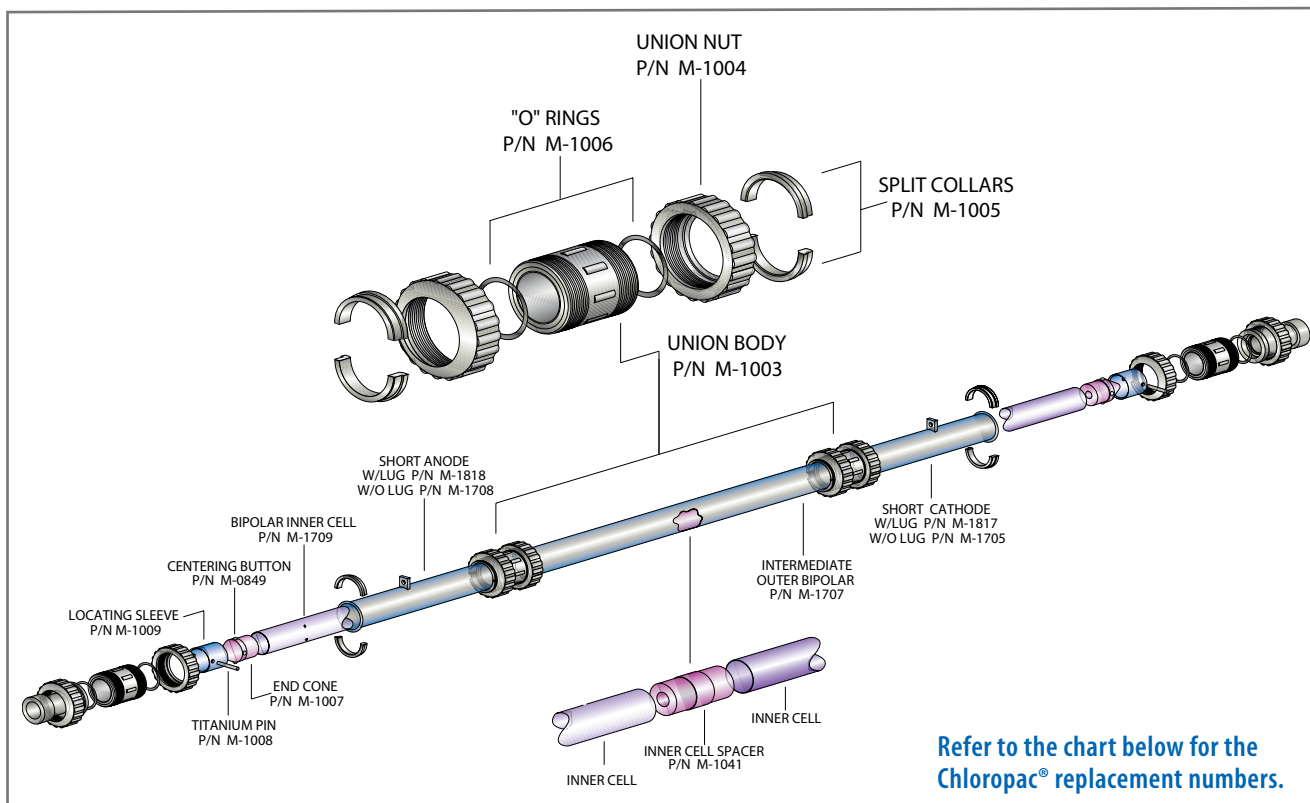

Optimum Water Technologies is a leading global supplier of complete systems and replacement spare parts for on-site electrochlorination in seawater bio-fouling control and water disinfection applications.

Optimize the performance of your Chloropac® CTE (Concentric Tubular Electrode) electrochlorination system with Optimum-T3 custom manufactured cell replacement parts to maximize reliability, on-stream performance, and reduce overall life cycle cost.

Optimum-T3 cell components are manufactured to exact dimensional specifications and tolerances for easy replacement, interchangeability, and continuous trouble-free operation. Each component must pass our stringent criteria for quality assurance and testing prior to shipment to the customer's site. Replacement components come with a one year conditional guarantee from date of installation or 18 months from date of shipment while the anode coating is typically guaranteed for a minimum of 5 years.

The Optimum-T3 cell anodes are coated with Optimum Anode Technologies' proven ChlorOxide™ EC or IROxide™ coating to achieve maximum electrolytic performance and coating life with low power consumption. While the ChlorOxide™ EC Mixed Metal Oxide coating is suitable for most warm water installations, IROxide™ provides superior performance in cold water applications (<10 C) or in the presence of high levels of organic contaminants or trace metals.

Description of Part	Chloropac® Part No.	OAT Equivalent Part No.
Centering Button	5/0849	M-0849
Union Body	5/1003	M-1003
Union Nut	5/1004	M-1004
Split Collars	5/1005	M-1005
'O' Rings	5/1006	M-1006
End Cone	5/1007	M-1007
Titanium Pin	5/1008	M-1008
Locating Sleeve	5/1009	M-1009
Inner Cell Spacer	5/1041	M-1041
Short Cathode (w/o lug)	5/1705	M-1705
Intermediate Outer Bipolar	5/1707	M-1707
Short Anode (w/o lug)	5/1708	M-1708
Bipolar Inner Cell	5/1709	M-1709
Short Cathode (with lug)	5/1817	M-1817
Short Anode (with lug)	5/1818	M-1818
